# To Whomsoever it May Concern

We are pleased to provide this letter in support of a labelling claim related to the clinical study conducted for **Naturo Health Matters Private Limited**, titled **An Open Label Clinical Study to Evaluate the Efficacy and Safety of Kids Nutri Immuno Supplement in Improving the Growth, Cognition, Performance, Immunity and Reducing the Incidence of Upper Respiratory Tract and Gastrointestinal Infections in Children** (Protocol No : **KIDSNUTRI/20/24**, Version: 1.2, Date: 11-11-2024 Report No : **KNI/12/25,** Version:1.0, Date: 23-05-2025).

Based on the analysis of the data collected during the study, the following label claims were supported:

**Growth & Development**

1) Supports healthy weight gain in children aged 4–6 years
2) Contributes to normal height growth in children aged 7–9 years
3) Helps improve BMI in children aged 4–6 and 10–12 years

- Supported by clinical evidence showing statistically significant improvements in weight, height, and BMI in age-specific groups over 8 weeks.

**Immune Support**

1) Supports immune health and helps reduce the incidence of common infections in children

- Mild and manageable URTI and GI symptoms observed, with no hospitalizations; reflects safety and immune-supportive potential.

**Eating Behaviour**

**1)** Encourages stable eating behaviour and greater food interest, especially in older children

- Participants aged 10–12 showed increased food interest and variety acceptance during the study period

**Memory and Cognitive Function**

**1)** Domains such as visuospatial/executive function, naming, attention, abstraction, delayed recall, and orientation showed slight improvements across different age groups.

**Safety Profile**

1) Safe for daily use in children aged 4–12 years

We confirm that the data generated support the inclusion of the above claim(s) in the product labelling, pending regulatory authority review and approval.

Please feel free to contact us should you require any further information or clarification.
